CAREER SUMMARY

Portfolio Link: https://a-morabet.github.io/my-portfolio/

Full-Stack MERN Developer with a healthcare background and a proven ability to learn fast, solve problems, and deliver clean, scalable solutions. Looking to join a team where I can grow my technical skills while contributing meaningfully to real-world projects. Driven by curiosity, improvement, and high-quality engineering.

EXPERIENCE

PERSONAL BUSINESS PROJECT: CODENAME "PROSHARE"   November 2024 - Present
- **Currently developing own business venture into marketplace platforms.**
- **Designing next-gen UGC pipelines and experience-driven interaction layers. Implementing a multi-criteria, multi-seller split-payout engine that balances complex business logic with a frictionless, crystal-clear UX for end-users.**
- **Delivering resilient database schemas and fault-tolerant backend services, ensuring seamless data managing and admin-grade control panels.**

PERSONAL PROJECT: MERN STACK | E-COMMERCE WEBSITE   August 2024 - October 2024
- **Engineered a full MERN-powered commerce platform as a high-fidelity showcase for prospective clients, demonstrating production-grade architecture and modular design patterns.**
- **Utilized Jason Web Tokens to create a secure user authentication system.**
- **Crafted a clean, UX-optimized interface using React-Bootstrap, ensuring consistent design language and frictionless user interactions.**
- **State Management handled with React-Redux to guarantee synced data for all users.**

PERSONAL PROJECT: REACT + TENSORFLOW.JS APP   January 2024 - May 2024
- **Created a React website with responsive and elegant design across all devices using Tailwind CSS.**
- **Applied fully functioning authentication system with Google Firebase.**
- **Integrated custom-made TensorFlow Image Classifier model that identifies dog species with high accuracy.**

PERSONAL PROJECT: INVOICE GENERATOR FOR HEALTH PRACTITIONERS   November 2023
- **Cut invoice writing time in half and allowed to allocate more time to other administrative tasks.**
- **Built with JavaScript, HTML and CSS to showcase understanding of core web technologies and fundamental principles.**

PERSONAL PROJECT: GOOGLE STORE MOBILE APP | WORD TRAINING   September 2022 - July 2023
- **Built a Unity mobile educational app from the ground up to help people improve their English day-to-day vocabulary skills.**
- **Designed a clear and intuitive interface for seamless user interaction, visual and audio fidelity increased with Adobe Suite.**
- **Developed thoughtful game mechanics that reward users for good execution and dynamically change difficulty depending on their performance.**

SKILLS

- **HTML CSS, JavaScript** –FreeCodeCamp Certified with 3+ years of experience.
- **React, Redux** – FreecodeCamp Certified with 3+ years of experience.
- **Firebase, MongoDB** – 2+ years of experience.
- **Client Interaction** – Effectively communicated technical concepts to clients during project meetings.
- **Quality Assurance** – Detected multiple UI bugs prior to project production, decreasing post-release issues.
- **Role Flexibility:** Increased project scope several times throughout development, learned new skills on the fly and reached chosen deadline.
